Detailed Action

Response to Amendment

- The reply filed on July 6, 2005 was applied to the following effect: Claim 1 was amended.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Beuch et al (USPN 6,274,844).

3. Regarding Claims 1 and 2, Beuch et al shows (Figs. 3 and 5) a disk cartridge comprising a recording disk medium of diameter 2 inches or less (Col 3, line 30) and a housing which is made up of a frame (24) and upper (18a) and lower (18b) metal shells covering the top surface and bottom surface of the frame and in which the disk medium (14) is rotatably enclosed, wherein the frame has a plurality of recesses (to each side of the curved portion where elastic tabs 318a and 318b engage together – (Col 4, lines 34-38) in side walls thereof, wherein side walls of the upper and lower shells are provided with a plurality elastic engagement pieces (318a, 318b) respectively engageable with the recesses of the frame (24), and wherein the housing is assembled and fixed together by engagement of the elastic engagement pieces with the recesses, wherein the elastic

engagement pieces are constructed to be engageable with the recesses of the frame along a vertical direction.

Allowable Subject Matter

4. Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed July 6, 2005 have been fully considered but they are not persuasive.

Applicant asserts on Page 8, that Beuch does not rely on the tabs to **fix** the upper and lower shells together.

The Examiner maintains that Beuch uses these tabs to fix (Merriam /Webster – to make firm, stable, or stationary) the upper and lower shells together, and they hold the position of the shells in place for subsequent welding. Therefore, the rejection of Claim 1 is upheld.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
